

Entering the superconsciousness workshop LA

Price: \$100.00

Short Description

Entering the superconsciousness workshop LA

Description

ABOUT THIS GATHERING

We are an ever-changing species like all things change is inevitable. With change comes

growth or expansion. Super-consciousness defines a natural upgrade that is expected to

occur in the human experience.

These upgrades occur in various stages according to the level of awareness of the

collective or of the individual. This natural occurrence is essential to the expansion of the

overall human game. There are different moments in the history of human life where

there are shifts in the overall consciousness. This gateway or field is generally more

noticeable through the obvious growth in technology. We are in a time where the

technology of spirit, mind, and body and the way that it all streams through the human

body is now open for small to vast, slow to fast upgrade opportunities. [**CLICK HERE**](#)
