Short Description

Sonia's Iworkshop -Decoding the cycles

2015 10 hours DVD

Description

Decoding the cycles; The cycles hold great significance as they are responsible for the mechanics of the material world, and although reality is regulated by consciousness, that regulation is based on our level of understanding both individually and collectively. The system simply mirrors back our level of consciousness. It moves in accordance with where we are as a species and individually. To decode the cycles and the manner in which we are woven into this network is really huge. The more that we understand the stronger our foundation in navigating our own transcendence otherwise all that we have is intellectual knowing and ideas that sound good with no way to implement them.
