Short Description

Sonia's workshop/webinar- Examining our individual coding

7 Hours - three parts -download

Description

7 Hours This three part workshop/webinar is intended to allow each of us to examine our individual coding.

This lecture explored the technology of this vast cosmic computised system to which we are tied. Our minds are interwoven into a complexity of program streams from which our individual journeys are constructed. Until we venture into this realization we will be confined to the gradual evolution of humanity based on the general system programs known as cycles. We are then predestined to operate from the collective stage one blueprint.

This three part workshop/webinar is intended to allow each of us to examine our individual coding. We will examine, explore and decode.

This was an interactive workshop. It is a webinar for those who are serious about investigating, decoding and concluding ancestral/bloodline and the collective programs. The only way to do it is to do it!!

She takes us on a journey of our existence in a holographic world, as she states "a virtual game; an assortment of illusions strung together by the brain and the mind. It's an exploration of the illusion of a solid world generated by fluid movements against a canvas of energy, all of which is taking place against the backdrop of the void." Barrett concludes that the answers are all tied into the forgotten past and like the single cell of a plant our history is encoded in our cells, DNA and the air we breathe.
