

Limitless and Unplugged workshops

Price: \$375.00

Short Description

Sonia's lecture- Creating profound consciousness shifts

28 hours (between two sets of workshops)

Description

UNPLUGGED was a six months workshop where we met once per month for six months. We have done several such workshops prior to UNPLUGGED. This however was a closed workshop available only to those who had attended the previous 6 months workshops.

To attempt to outline all that was shared is challenging. Each month there was an assignment based on the information shared and participants used the science to change their lives...creating profound consciousness shifts. Such shifts begin to transform our lives beyond the survival protocols of reality. You will be happy that you invested in these workshop audios.

TOPICS DISCUSSED (so much more than listed here)

How you play your money game, your health game and your life game

What are the scripts that you have given to each character or situation in your life?

Overriding the database of the robotic self

Living beyond finite paradigms- The science and design of the playground of consciousness

Accessing pure potential- science of the implicate and explicate order and the observer

The holographic nature of our lives, our bodies; the organs within it
The merging of space and time into a singularity- how it relates to the possibility of instantaneous travel
The invisible realms and the wave particle phenomenon
Everything that we want to be and to experience already is- how to tap into this process
Brain circuits; neuroconnections and neuropathways
Understanding Time and the Continuum; the mathematical coordinate system of spacetime

LIMITLESS WORKSHOP 14 HOURS (6 months' workshop)

Here we met once per month for six months. Workshops are not outlined ahead of time and so below is a brief list of topics addressed over the 6 months period. What we experienced is far more than can be summarized here. This was a closed workshop available only to those who had attended the previous 6 months workshops.

To attempt to outline all that was shared is challenging. Each month there was an assignment based on the information shared and participants used the science to change their lives...creating profound consciousness shifts. Such shifts begin to transform our lives beyond the survival protocols of reality. You will be happy that you invested in these workshop audios.

TOPICS DISCUSSED

Who and what you have identified yourself as is just a running program

Observing every moment as an opportunity

Discussing both hemispheres of the brain and the creative process

Making a choice to activate your body beyond the robotic nature of the collective

Understanding the cycles under which your body is being run

Bio-emotional fragments

The cosmic wireless network

13 year cycles

Fertility and life force

Beyond collective evolution
